branding  
infographics

## education

B.A. in Architecture  
University of Pennsylvania,  
2012

## portfolio

[aliciakw.github.io](http://aliciakw.github.io)

## employment history

### Web Developer, Cisco Systems

(Mar. 2014 - Present)

*Working on a small team, I design and maintain and deploy internal and external web sites (mostly rails apps). Additionally I provide graphic design & branding services.*

- **RulesUI (A bug tracker application).** *I designed a responsive dashboard to allow Cisco malware analysts to edit detection rules used in a virus scanner. Live changes, team metrics and integration of specialized tools optimize RulesUI for the users' workflow and team norms. Working with another developer, we created an Ember application with a Rails API.*
- **ClamAV.net** *I was the lead UI designer and web developer for this modern, lightweight Ruby application for an opensource software. Templates allow content written in markdown for user-friendly updates, while a Ruby back-end handles file submission and updates content.*
- **Snort.org** *As part of a team, I am responsible for maintaining and providing enhancements for this traditional Rails application. My work on snort.org included elasticsearch and a self-updating FAQ documentation integrated with github.*

### Designer, MRA/Sardi Design

(2012 - Feb. 2014)

- **Graphic Design, Web Design & Social Media,** *including presentations, illustrative and architectural drawings, diagrams, renderings and infographics, including a temporary MRA webpage. I also worked as part of a team to overhaul two company portfolio websites*
- **Architectural Research & Project Budgets** *to support sponsorship, immersive technology integration and destination strategy designs.*

## freelance

- *West Virginia's Water Crisis* – [wwaterhistory.com](http://wwaterhistory.com)
- *Advocates for a Safe Water System* – [asws-wv.org](http://asws-wv.org)
- *B-Alt Lending Library* – branding & website
- *Curry Printing* – visual merchandising
