Sr. Engineer @ GATHERLY 01/2021 - present. Engineer at a young spatial video chat startup allowing highly customizable virtual events. Worked on chat, speed test, and photobooth features on main platform before rearchitecting and becoming the lead engineer for event admin app. Supported SOC2 cert, developed tech interview process, and mentored devs on design literacy

Software Developer @ SANCUTARY COMPUTER 09/2018 - 02/2020. Coder at one of NYC's top digital agencies, working with clients needing high design accuracy, elegant interactivity, reliable performance; and often were launching products to push the zeitgeist of culture. Projects included the website for Coffee Manufactory and the LightPhone II OS & ecosystem.

Software Engineer II @ QUARTET HEALTH 05/2016 - 05/2018. JS developer helping to take flagship product from an MVP therapy referral tool to a fully-fledged collaborative care platform where doctors, patients, insurance reps and therapists can coordinate the best patient care possible. Member of frontend arch. working group, automated EHR referral flow & supported two successful API migrations.

Software Engineer @ BIRCHBOX 11/2015 - 02/2016. Dedicated dev for marketing pages and seasonal promotions on a large eCommerce site serving 4 countries. Created A/B testing plugin for CMS and developed many reusable components.

Software Engineer @ TALOS INTEL of CISCO SYSTEMS 02/2014 - 10/2015. Designed and built marketing / distribution sites for anti-malware products as part of the internal web team. Also built an internally-hosted github-like collaboration platform for malware analysts to edit, test and publish new antivirus rules.
